I bring over 4 years of experience as a full-stack software developer, proficient in the MERN software stack. I have implemented custom software for the Corporate Affairs Commission and developed various custom applications to increase efficiency and effectiveness within the organization. I love the challenge of working with cutting-edge technology and have always had an eye for detail. My work experience enables me to develop comprehensive applications and provide a meaningful solutions to clients without compromising on quality.

Professional Experience

Software Developer Consultant

Corporate Affairs Commission | April 2019 - Present

- Oversaw and managed server needs using Node.js
- Designed, developed, and maintained an algorithmically operated application that shared information with the head office in real-time and tagged it based on priority level to help employees distribute the workload.
- Responsible for continuous integration, quality assurance, code analysis, and fixing bug.
- Refactor a custom algorithm that helped reduced time complexity.
- Thoroughly analyze code, leading to a 20% decrease in bugs detected

Software Developer (Internship)

Corporate Affairs Commission | April 2019 - March 2021

- Collaborated with multiple teams to develop, debug and maintain software solutions for in-house projects. I have presented information about my work to senior team members, who have often been very interested.
- Contributed to the design and development of an API-based app to support daily operations within the corporation.

Software Developer

Freelancer | March 2021 - Present

- Met and communicated with clients to manage expectations, **analyze** project goals, and optimize individual solutions
- Developed and implemented a full-stack e-commerce application for clients and customers.
- Integrated Stripe and PayStack payment gateways that helped increase sales for a client's online store
